🪪 Profile

I am seeking a company where I can utilize my education and skills to implement new ideas towards meet company's objective goal. I am excited about the prospect of collaborating with a dynamic team to implement fresh ideas that will propel the company forward.

🧠 Skills

TECHNICAL SKILLS

• Programming Languages
Python, JavaScript, C

• Data Analysis
Python's pandas , Matplotlib or Seaborn

• Web Development
HTML, CSS, React, Node.js, Django

• Database Management
MySQL, MongoDB

• Machine Learning and AI
scikit-learn

💻 Projects

• Weather Web :
The Weather Forecast Web Application is a dynamic and user-friendly web tool designed to provide up-to-date weather information for any location worldwide.

• Online Job Portfolio :
it's a powerful tool for showcasing my skills and work to potential employers and clients. Its interactive features, modern design, and use of the MERN stack demonstrate my expertise in web development.

• Data Analytics Projects Using Python

• Various Algorithm Implement In DAA

🎓 Education

BACHELOR OF TECHNOLOGY IN COMPUTER SCIENCE,
2022 Sep – Present | Ahmedabad, India
I am currently engaged in the pursuit of a Bachelor's degree in Computer Science, with a focused emphasis on Mathematics. My academic journey encompasses practical engagement in real-world projects, adeptness in data analysis, proficiency in machine learning, web development, diverse programming languages, and an array of other pertinent areas.
